*"Eventually on July 20, 2016, the Ethereum network was hard forked to move the funds in The DAO to a recovery address where they could be exchanged back to Ethereum by their original owners. However, some continued to use the original unforked Ethereum blockchain, now called Ethereum Classic. In September 2016, Poloniex de-listed DAO trading pairs, followed by Kraken in December 2016. Operation The DAO was a decentralized autonomous organization that exists as a set of contracts on the Ethereum blockchain, with no physical address or officials with formal authority. The theory underlying the DAO was that keeping operational power directly in the hands of owners, not delegated to managers, would ensure that invested funds would be used in the owners' best interests, thus solving the principal-agent problem. As an on-chain organization, The DAO claimed to be completely transparent, since everything was done by the code which anyone could see and audit."*

*"For instance, a 2021 study observed unusually high cryptocurrency returns in the 24 hours before and after stablecoin issuances. In 2022, another study found that bitcoin prices increased following public announcements by Whale Alert on Twitter about Tether minting USDT. Media research Bloomberg News reporters found irregularities on the Kraken cryptocurrency exchange, with small market orders moving the market price of Tether as much as larger market orders from 1 May 2018 to 22 June 2018. New York University Professor Rosa Abrantes-Metz and Federal Reserve bank examiner Mark Williams suggested the unusual order sizes were indicative of wash trading by automated trading programs. Kraken offered a rebuttal of these claims, stating that Bloomberg News misunderstood the concept of stablecoin and that the market price of Tether was not greatly influenced by market order size because Tether was a stablecoin pegged to the United States dollar. The user responsible for unusual order sizes also confirmed that the oddly specific order sizes and decimal places were "randomly selected"."*
